Aspocid

It prevents the formation of blood clots in people

prone to the formation of blood clots and is used

children after heart bypé rgery

Instructions the patient must follow with this

medicine

Aspirin may cause severe allergic reactions so caution should be
exercised.

You should take Asposid after eating because it may cause
stomach pain

Be careful if you suffer from bleeding and inform your doctor
immediately

Capoten

Lowers blood pressure, which means that the blood vessels are
allowed to relax and dilate and thus blood flows easily to the
body

Some people may experience dizziness due to low blood pressure
in the first few days of taking this medicine

If you often feel dizzy, inform your doctor

Inhibitors can sometimes cause allergic reactions, so stop taking
this medicine and consult your doctor immediately

It is preferable to take Capoten half an hour before eating
